

FreshMart Retail Ghana Sales Performance Analysis Project

Portfolio Project: Organizing and Exploring Data in Excel

You have been hired as a Junior Data Analyst by FreshMart Retail Ghana. Management wants to understand product performance, regional sales trends, and sales manager effectiveness. Using the provided 100-record dataset, organize, explore, and analyze the data using Excel.

Project Objectives

- Apply professional Excel formatting techniques.
- Use sorting and filtering to answer business questions.
- Apply conditional formatting to identify patterns and exceptions.
- Generate meaningful business insights and recommendations.
- Build a portfolio-ready Excel project suitable for LinkedIn and GitHub.

Deliverables

1. Completed Excel Workbook
2. Analysis Report (1–2 pages)
3. Screenshots of key findings
4. LinkedIn project post (optional)
5. GitHub repository containing project files

Part 1: Professional Formatting

Using the provided dataset, apply the following:

- Merge and Center report title
- Font formatting
- Borders
- Shading
- Alignment
- Number formatting
- Currency formatting
- Date formatting
- Format as Table
- Text Wrapping
- Indentation
- Remove Gridlines
- Insert a company logo or suitable image

Part 2: Sorting Tasks

1. Sort Revenue from Largest to Smallest.
2. Sort Units Sold from Largest to Smallest.
3. Sort Product Names alphabetically (A–Z).
4. Sort Sales Date from Newest to Oldest.
5. Perform a multi-level sort: Region, then Revenue.

Questions

- Which product generated the highest revenue?
- Which products sold the most units?
- Which region contains the highest-performing products?

Part 3: Filtering Tasks

1. Show only Food products.
2. Show only products sold in Accra.
3. Show products with Revenue greater than GHS 5,000.
4. Show products handled by one selected Sales Manager.
5. Show Beverage products in Kumasi only.
6. Show products with Units Sold below 30.

Business Questions

- Which Food products perform best?
- Which products drive sales in Accra?
- How many high-performing products exist?
- Which manager appears most successful?

Part 4: Conditional Formatting

Apply the following:

- Highlight Revenue above GHS 5,000
- Highlight Units Sold below 30
- Apply Color Scales to Revenue
- Apply Data Bars to Units Sold
- Highlight Top 5 Revenue Values

Part 5: Business Insights

Write at least five business insights discovered from your analysis. Examples:

- Best-performing product
- Best-performing region
- Underperforming products
- Manager performance observations
- Sales trends identified

Part 6: Recommendations

Provide at least three recommendations for management based on your findings.

Project Evaluation Criteria

- Professional Formatting (20%)
- Sorting Analysis (20%)
- Filtering Analysis (20%)
- Conditional Formatting (15%)
- Business Insights (15%)
- Recommendations and Presentation (10%)
